

Community Garden Guidelines

We have plenty of room for every gardener to get their hands dirty!

All Live Oak residents are encouraged to join in the planting and care of our community garden. To provide a positive experience for everyone, we ask that these guidelines be observed:

- You may sow or plant your own vegetables where space is available.
- If sowing seeds, please mark the locations to show the space is taken.
- Please be mindful of existing plants and other residents' gardening efforts.
- If you want to keep your harvest for personal use, please mark the plants with your name. (But remember, staff does not monitor or enforce harvesting limits.)
- Harvest from unmarked plants is available to all residents and staff. Please harvest amounts for your personal use.
- Take care to not damage plants or harvest from plants marked with another resident's name.
- All residents are welcome to weed the garden areas, and to harvest from plants not marked with another resident's name.

Questions or concerns? Please visit our onsite Program Support Staff.
